

PROPOSITION THREE: LAND PURCHASE

The land purchase will allow the school district to correct a 6-year New York State Department of Environmental Conservation (NYS DEC) violation. On the proposed 10 acres, we plan on building a sewer system large enough to handle all school buildings' outflow. The proposed 10 acre lot is directly behind our stadium home bleachers. The school district has a land purchase agreement with the owner in the amount of \$40,000.00. Once the leach field is built, the school district may use a portion of the land for other purposes. Without correcting our sewer system problem, we will likely face fines and risk shut down from the NYS DEC.
