Committee on Special Education Chairperson

Re-Opening Plan

Revised 3/1/2022

Mask Policy (as of March 2, 2022): Students, staff and all visitors have the option to wear a mask or not on school district property. On school buses, masks are optional as well.

Cleaning Protocols: We will continue to spray disinfectant in classrooms and on buses when appropriate. In our buildings we use the Clorox 360 machines with Electrostatic technology.

Transportation: Masks are optional on school buses. Children of the same household will be seated together on school buses. Disinfectant spray may be used after each bus run. Windows and roof hatches will be open whenever weather permits. Social distancing will be enforced whenever possible.

Temperature Checks: We ask parents to perform daily temperature checks at home.

Social Distancing: While students are in the building we will follow the CDC guidelines of 3 feet social distancing in all classrooms. Classroom seating charts will be maintained for contact tracing purposes. Elementary School seating charts will be used during lunch. When needed, our Jr.-Sr. High School lunch periods will be assisted by our camera system for contract tracing purposes.

Contact Tracing: It is required by the Cayuga County Health Department that our school district continue to contact trace.

Quarantine Rules: This is controlled by the New York State Department of Health. Please check their website for updates as needed.

School Breakfast/Lunch: We will continue to have school meals in the cafeteria. Seating charts in the elementary school will be used for contact tracing purposes. In the Jr.-Sr. High School, we will use our camera system for contact tracing purposes. Whenever possible, we will take elementary students outdoors after they are finished eating.

When to Stay Home: If your child(ren) has a fever, please do not send them to school or to extra-curricular activities. If your child(ren) do not have a fever but are experiencing any of the other symptoms listed below, please don't put others in jeopardy. Use the home test kits provided. Prevention is essential.

- Temperature of 100 degrees or higher
- Cough
- Shortness of breath or difficulty breathing
- Fatigue
- Muscle or body aches
- Headache
- New loss of taste or smell
- Sore throat
- Congestion or runny nose
- Nausea or vomiting, diarrhea
