The Student Experience

AI Summary

Review an automatically generated summary of thoughts in this theme

The responses to the asked question suggest a variety of changes that could be made to improve the school system. Suggestions include more field trips, college level classes, stronger athletics, increased focus in science and technology, increased support for students, teaching more life skills, updating technology class offerings, improving social-emotional and academic outcomes, more Advanced Placement classes, creating a fun school culture, focusing on evaluating learning problems, teaching spelling, reading, and basic grammar, more planning support for teachers, preparing students for college and beyond, improving physical health and safety during sports, making sure students feel safe and heard, and more. These responses demonstrate the importance of providing students with a well-rounded education and a safe and supportive environment.

Bring back shop class, woodworking, welding, engine repair

These are great life skills and are the foundation for good jobs in demand. Not everyone is going to college but we still need to support ourselves.

Something needs to be done about lunch periods for the Boces students.

Kids that go to boces half the day shouldn't have to go without lunch because of there not being enough time between the bus arriving and 6th period.

Updating the technology class offerings.

We live in a technological world that is ever evolving, we need to make sure that our student are well prepared to enter that world.

High school bathroom issues and vaping. Kids being told they can not use the bathroom because others want to be destructive or use drugs in them

You can't deny our children bathroom access when they require it. It's unhealthy and can cause major issues.

The athletics department is struggling. We need more data driven programs so kids don't get discouraged and frustrated and ultimately quit.

Athletics are a big part of the HS experience that prepare students for a healthy, well rounded life while pushing students to excel in academics.

Improving social-emotional and academic outcomes for students

Students need to be prepared to be successful when they leave here and enter the real world.

The Student Experience

Handwriting has become an issue among other things. Our kids need to get back to basic and spend less time on electronics

They need to know how to sign their names, write letters, fill out paperwork etc as they get older.

Need to look into different ways to control behavioral problems.

When students need constant reminders to behave how can teachers do their job let alone kids learn.

 3.9

More college level classes, smaller classes. More opportunities. Stronger athletics, better coaches. More support.

Kids have 4 years of HS. 4 years to make a difference. They don't have time for "we're trying" to improve. "It's going to happen in the future"
